Confidential Questionnaire

Breast Study

Name _____ Birth Date _____ Today's Date _____
 Address _____ City _____ State _____ Zip _____
 Phone Number Home _____ Cellular _____ Work _____
 E-Mail Address _____
 Referring Physician _____

Is there a specific reason or concern for this exam?

Yes	No
-----	----

1. Have you recently had any of these breast symptoms? (Mark only if "yes")

	LT	RT
Pain/Tenderness	_____	_____
Lumps	_____	_____
Change in breast size	_____	_____
Areas of skin changes thickening or dimpling	_____	_____
Excretions or changes of the nipple	_____	_____

2. Are any of the above symptoms cycle related?

3. Are you still having your periods? **If yes: Date of last period** _____

4. Have you had a surgical hysterectomy?

If yes, date _____ Complete ___ Partial ___

Reason for hysterectomy?

Excess bleeding Endometriosis Fibroid cysts Cancer Other

5. Has anyone in your family ever been treated for breast cancer?

If yes, note age and survival Mother Grandmother Sister Daughter

Age diagnosed _____ Result of Treatment _____

6. Have you ever been diagnosed with breast cancer?

If yes, date: _Month _____ Year _____

Cancer type Local Metastatic Lymph node involvement

Left breast Inner Outer Nipple

Right breast Inner Outer Nipple

Treatment Surgery Chemo Radiation None

If Surgery; Mastectomy Lumpectomy

7. Have you ever been diagnosed with any other breast disease? _____
- If yes, Cysts/fibrocystic Fibro Adenoma Mastitis/inflammatory breast disease
8. Have you had any cosmetic breast surgery or implants? _____
- If yes, date _____ Silicone Saline Reduction
- Experience: Problems No problems
9. Have you ever had any biopsies or any other surgeries to your breasts _____
- If yes, date _____
- Left breast Inner Outer Nipple
- Right breast Inner Outer Nipple
- Results Negative Positive Calcifications

Mark on the following graph to indicate location of pain, surgery or lumps:

Clock and Quadrants of the Breast

Yes	No
-----	----

10. Have you ever taken contraceptive pills for more than one year?
 If yes, Currently Less than 5 years More than 5 years
11. Have you had pharmaceutical hormone replacement therapy (HRT)?
 If yes, Currently Less than 5 years More than 5 years
12. Do you have an annual physical examination by a doctor?
13. Do you perform a monthly breast self exam?

18. Your age at your first mammogram? _____
19. Number of full term pregnancies? _____
20. Have you had breast ultrasound?
 If yes...Date: ____/____ Left ____ Right ____ Results: Negative ____ Positive ____
21. Have you had breast MRI?
 If yes...Date: ____/____ Left ____ Right ____ Results: Negative ____ Positive ____

Do you have any special concerns or are there any details related to the information above?

Client Disclosure

Breast thermography is a non-contact, private and non-invasive procedure. The value of thermography as a study tool is its ability to measure skin temperature changes. **It offers men and women information that no other procedure can provide regarding breast health.**

Breast thermography is not a replacement for or alternative to mammography or any other form of breast imaging. Breast thermography, mammography or breast ultrasounds are complementary procedures; **one test does not replace the other.** Breast thermography is meant to be used in addition to other tests or procedures.

Thermography captures and records temperature variations on the skin, which provides vital information directly influenced by complex metabolic and vascular activity. This information **does not in any way suggest diagnosis and/or treatment.** Studies show that the patient benefits when multiple tests are used together. This multimodal approach includes breast self-examinations, physical breast exams by a doctor, mammography, ultrasound, MRI, thermography, and other tests that may be ordered by your doctor.

A reported “Elevated Level of Concern” finding does not indicate that it is suspicious for any specific disease. However, any suspicious finding will be accompanied with a strong and intentional recommendation for further clinical evaluation. If you detect a lump or any other change in your breast before your next thermogram study, consult your doctor immediately.

Notice to clients presenting with previously diagnosed cancer: Thermography interpretation in your report **does not include information or recommendations related to the measured changes of disease beyond skin temperature changes and patterns.** As there is no single known test capable of monitoring all biological influences of the complex disease generally diagnosed as cancer, **continued monitoring with available additional testing as recommended by your personal physician is strongly advised.** Your Thermographer may not be a licensed medical professional. **Your Thermographer cannot interpret your images or advise or prescribe to you based on your images.** Your thermographer can ask health history questions as well as educate you on general breast health.
